

Case Study

Transforming Swiss Real Estate

The Challenge

Inefficient management processes hinder property success.

Timeline of Transformation

Initial Issues

Scattered documents and telephone requests created confusion and inefficiency.

Our Intervention

Modern websites and automation have transformed request management.

Measurable Results

70% reduction in management time and increase in property visits.

70%

Reduction in management time

This led to significant operational efficiency improvements overall.

30%

Increase in property visits

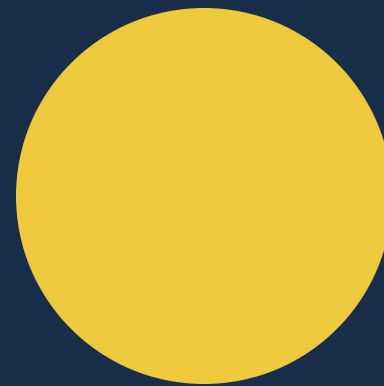

More clients engaged due to the streamlined process.

Key Results

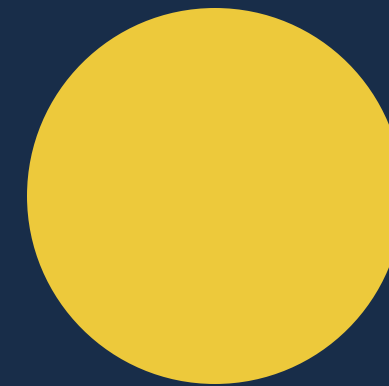

Lean Operations

Optimized processes for more effective property management.

Customer Engagement

Greater interaction with customers through new tools.

Data Management

Databases organized for quick access and management.

AI is not the future.
It is the advantage of those who
choose to live better, not just work harder.
